1. HANDICAP CONDITIONS

1.1 Do handicap conditions prevail when golf carts/buggies are permitted?

The Rules of Golf do not prohibit the use of golf carts/buggies. Therefore the use of a golf cart/buggy in itself will not cancel the status of handicapping conditions. If the conditions of a competition prohibit the use of golf carts/buggies and because of the breach of those conditions the player is disqualified, the score will still be acceptable for handicapping purposes.

1.2 Do handicap conditions prevail when distance-measuring devices are permitted?

The Rules of Golf prohibit the use of distance-measuring devices unless they are allowed by a Local Rule (see Note to Rule 14-3). However, even without such a Local Rule, handicap conditions are considered satisfied when distance-measuring devices are used during qualifying competitions or EDSs. Thus, if the player was disqualified because of a breach of Rule 14-3 for using a distance-measuring device when not permitted, the score will still be acceptable for handicapping purposes (see Clause 3.6.2 c.).

1.3 Do handicap conditions prevail when greens staff carry out maintenance work during a qualifying round?

When this occurs and the competition/handicap committee has not taken any action such as suspending or cancelling the round, the scores are considered as returned under handicap conditions and will be acceptable for handicapping purposes.

1.4 Do handicap conditions prevail when artificially surfaced tees or putting greens are in use?

Artificially surfaced tees and putting greens are acceptable under the Rules of Golf provided the proper provisions have been made in a Local Rule to declare them not to be immovable obstructions but to be integral parts of the course. The USGA Course and Slope Rating Committee has confirmed that artificial turf may be rated under the USGA Course Rating System. When both these conditions have been fulfilled and providing that the artificial tees and putting greens are located in positions that comply with the measurement of the relevant hole, scores returned from qualifying rounds played from artificially surfaced tees or putting greens are considered qualifying scores returned under handicap conditions.

1.5 Do handicap conditions prevail when the use of fairway mats to protect the course is obligatory?

Yes, a club may run a qualifying competition under such conditions provided:
- their use is obligatory and restricted to the National Association’s Period for Preferred Lies;
- all other handicap conditions prevail;
- a Local Rule for the use of fairway mats has been set out in the Conditions of the Competition.

The suggested wording is:
“A ball that comes to rest on a closely mown area through the green must be lifted, placed and played from an Astroturf or similar type of mat. The mat must be placed as near as possible to where the ball originally lay not nearer the hole. The ball may be cleaned when lifted under this Local Rule. If a ball when placed rolls from the mat it may be replaced without penalty. If it still fails to remain on the mat, the mat must be moved to the nearest spot not nearer the hole where the ball, when placed on it, will remain at rest. There is no penalty should the ball move or be moved after being placed on the mat and before making a stroke, including when addressing the ball or taking a practice swing. Should a tee peg be used to secure the mat the ball must not be placed on the tee”.

The purpose of this decision is to help promote qualifying competitions whenever possible during the Period for Preferred Lies.
1.6 Do handicap conditions prevail in extended competitions with eclectic or aggregate awards?
If, from a series of scores, special prizes are awarded for the best eclectic score or the best net or gross aggregate of a prescribed number of scores, each individual score in the series is:
- a qualifying score provided each score is returned under handicap conditions in a qualifying competition.
- a non-qualifying score if it was returned solely for the purpose of eclectic, net or gross aggregate awards.

1.7 Is a competition a qualifying competition when players are allowed to start play on different holes?
Competitions in which competitors are authorised to start play on different holes, such as a two-tee or shotgun start, are qualifying competitions provided all other handicap conditions prevail. The same considerations apply to EDSs.

2. RIGHTS AND OBLIGATIONS OF THE HANDICAP COMMITTEE AND THE PLAYER

2.1 Should a handicap committee adjust a handicap retrospectively such as for a player who has taken his card away with him after a qualifying competition or where an away score is returned when other scores have been entered subsequently?
Yes, the scores are qualifying scores so they must be considered for handicapping purposes. Any subsequent CBA, if applicable, must not be recalculated.

2.2 Can a handicap committee, before the commencement of play, declare a round to be “reduction-only”?
No. There are only two situations where handicap adjustments can be reduction-only: a round where application of the CBA calculation determines a value of -2/RO, and when a round already underway is cancelled by the Committee (Clause 3.6.2 a). In the latter situation, handicap adjustments are calculated on the basis that the CBA, if applicable, is 0.

2.3 How should a handicap committee deal with a player who is found to have different handicaps maintained at two home clubs simultaneously?
The player must have only one home club at a time. The player must decide which is his home club and this club must then review his record using the lower of the two handicaps and all scores available. Until this matter is resolved, the player’s handicap must be suspended.

2.4 Can a handicap committee reduce a handicap in order to enable a player to enter a competition, or for any other reason not directly associated with playing ability?
No. This is completely against the spirit of handicapping and could also deprive another player of a place in the competition.

2.5 May players be required to enter their own scores into a computer?
Usually score cards have to be returned to the committee in charge of the competition who will then enter the scores into the computer. However, if the handicap committee requires players to enter their own scores (including EDSs) into the computer of the club, players must do so and then return their scorecard to the handicap committee for verification purposes as soon as practicable. Other arrangements to allow handicap committee verification of any EDS are acceptable, provided that the handicap committee is satisfied that the correct score was recorded.

2.6 May a committee impose a penalty under the Rules of Golf for failure to enter a score into a computer?
Players may be required by a condition of the competition to assist the *handicap committee* in several ways such as:
- provide the score total and apply the correct handicap;
- enter the Stableford points total on the card;
- on completion of the round, enter the hole-by-hole scores into a computer.

However, a *handicap committee* may not impose a Rule of Golf penalty when a player fails to comply with any of the above conditions.

The Rules of Golf are very specific as to what the player’s and any committee’s obligations are with respect to score cards. Conditions of the Competition cannot change these requirements. No penalty under the Rules of Golf can be imposed provided the player complies with Rule 6-6. However, the *handicap committee* would be justified to consider disciplinary action such as suspension of the handicap (see Section 3.13) or exclusion from the next competition(s).

2.7 May a player have two *home clubs*?

No, a player must not have more than one *home club* at a time.

Generally, if a player is a member of two *affiliated clubs* affiliated to two different *national associations*, he must select one club as his *home club* which administers his handicap. However, if the player resides within each *national association* for considerable periods of time, he may choose to switch his *home club* during the year accordingly. Each *affiliated club* may administer his handicap only for the time he has nominated them as his *home club*. As soon as he changes his *home club*, he must present his handicap record to his new *home club*. Furthermore, the player must declare which of those two *affiliated clubs* is to perform the *handicap review*, at the end of the season. Generally, this should be the club at which the player has returned most qualifying scores.

3. QUALIFYING SCORES

3.1 A player returns a qualifying score from a round played under the jurisdiction of another *national association* (which is not the player’s handicapping authority). How should this score be applied for handicapping purposes?

The player has to provide his *home club* with the following information:
- evidence that it was a qualifying score (e.g., a copy of conditions of competition or a list of official scores);
- name of the club at which the round was played, and information about the *national association* for that club;
- a score card with the hole-by-hole scores;
- Par and handicap stroke index of each hole played;
- USGA Course Rating and Slope Rating values of the course (tees) played (the latter is essential for handicap review);
- EGA Playing Handicap Differential for players in handicap category 6 (in EGA countries);
- CBA (or equivalent) of the competition round, if applicable.

This information enables the player’s *handicap committee* to establish the correct playing handicap and to use the away score for handicapping purposes by converting the score into Stableford points according to *EGA Handicap System* requirements. If applicable, the CBA calculation must be applied before any handicap adjustment.

3.2 A player returns a qualifying score from a round played under the jurisdiction of another *national association* which has not adopted the *EGA Handicap System*. How should this score be applied for handicapping purposes?

In addition to the information required as defined in 3.1 above, the following will need to be taken into account:
CONGU:
When no *Course Rating* is available use SSS (Standard Scratch Score); when no *Slope Rating* is available use 124.
The *playing handicap* calculation (see Clause 3.9) will be adjusted accordingly and scores returned from rounds played under the jurisdiction of CONGU are then converted into Stableford points according to the requirements of the *EGA Handicap System*.
The difference “SSS – CSS” must be applied to the players’ Stableford score as the CBA adjustment, if applicable.

**Example 1:**
IF COURSE RATING AND SLOPE RATING ARE AVAILABLE
A player with an *EGA Handicap* of 3.5 plays a competition run by a club under the jurisdiction of CONGU. The course has a SSS of 73, a *Course Rating* of 72.6, a *Slope Rating* of 137 and the Par is 71. The CSS was 74.

The *EGA Playing Handicap* (PH) is calculated as follows:

\[
PH = EGA\ Handicap \times \frac{SR}{113} + (CR - PAR) = \frac{3.5 \times 137}{113} + (72.6 - 71) = 5.84 \approx 6
\]

The Stableford points are calculated using the *EGA Playing Handicap*:

The CBA is calculated using the formula:

\[
CBA = SSS - CSS = 73 - 74 = -1
\]

The player’s *EGA Handicap* is not modified as his score is inside the adjusted *buffer zone* 34-35 (CBA -1).

**Example 2:**
IF ONLY STANDARD SCRATCH SCORE IS AVAILABLE
A player with an *EGA Handicap* of 3.5 plays a competition run by a club under the jurisdiction of CONGU. The course has a SSS 73 and the Par is 71. The CSS was 74.

The *EGA Playing Handicap* (PH) is calculated as follows:

\[
PH = EGA\ Handicap \times \frac{124}{113} + (SSS - PAR) = \frac{3.5 \times 124}{113} + (73 - 71) = 5.84 \approx 6
\]

The Stableford points are calculated using the *EGA Playing Handicap*:
The CBA is calculated using the formula:

\[ CBA = SSS - CSS = 73 - 74 = -1 \]

The player’s EGA Handicap is not modified as his score is inside the adjusted buffer zone 34-35 (CBA -1).

**USGA:**

The playing handicap will be calculated (see Clause 3.9) and scores returned from rounds played under the jurisdiction of the USGA are converted into Stableford points according to the requirements of the EGA Handicap System. If no adjustment for playing conditions exists, apply CBA = 0.

**Example:**

A player with an EGA Handicap of 3.5 plays a competition run by a club under the jurisdiction of USGA. The course has a Course Rating of 72.6, a Slope Rating of 137 and the Par is 71.

The EGA Playing Handicap (PH) is calculated as follows:

\[ PH = EGA \text{ Handicap} \times \frac{SR}{113} + (CR - PAR) = 3.5 \times \frac{137}{113} + (72.6 - 71) = 5.84 \approx 6 \]

The Stableford points are calculated using the EGA Playing Handicap:

The player’s EGA Handicap is increased by 0.1 as his score is outside the buffer zone (35-36).

**Other countries**

Countries using handicapping systems other than CONGU and USGA which use the USGA Course Rating System: see USGA.

Scores from rounds played in other countries are not acceptable for handicapping purposes.

3.3 How will a score returned in a competition where handicap limits apply, but where the player’s handicap exceeds the limit, be treated for handicapping purposes?

The score is a qualifying score provided the handicap conditions are satisfied. The competition result is calculated using the EGA Handicap limits imposed by the conditions of competition. However, for handicapping purposes, the handicap committee must calculate the Stableford score for each player using the playing handicap based on the EGA Handicap.
Example:

A player with an *EGA Handicap* of 28.2 plays a competition where the *EGA Handicap* limit is 24.0. The course has a *Course Rating* of 71.2, a *Slope Rating* of 129 and the Par is 72.

The *EGA Playing Handicap (PH)* for the competition is calculated as follows:

\[
PH = EGA \text{ Handicap} \times \frac{SR}{113} + (CR - PAR) = 24.0 \times \frac{129}{113} + (71.2 - 72) = 26.6 \approx 27
\]

The *EGA Playing Handicap (PH)* for handicapping is calculated as follows:

\[
PH = EGA \text{ Handicap} \times \frac{SR}{113} + (CR - PAR) = 28.2 \times \frac{129}{113} + (71.2 - 72) = 31.4 \approx 31
\]

3.4 How should scores returned in stroke play competitions where handicaps do not apply be used for handicapping purposes?

Even if handicaps do not apply for the competition results, the scores played in such rounds are *qualifying scores* provided the *handicap conditions* are satisfied. The *handicap committee* must calculate the Stableford score for each player using the *playing handicap* based on the *EGA handicap*.

3.5 May an *EDS* 9-hole score, returned when 18 holes have been played, be accepted for handicapping purposes?

Yes, provided that the player had previously registered the 9-hole *EDS* as required. The provision that a 9-hole score may not be part of an 18-hole score is intended to prevent the player from choosing the better of the two 9-hole scores. This decision may appear to be against the spirit and intent of allowing 9-hole scores, but it would not be appropriate or practicable to interfere with the way players plan to spend their time.

3.6 What is the status of a player’s score when the Committee allowed him to play in a competition for which he did not satisfy the entry requirements?

If a player returns a score after playing in a competition which he was allowed to enter by the Committee even though he did not meet the eligibility provisions, the score is a *qualifying score*.

4. **COMPUTED BUFFER ADJUSTMENT**

4.1 A competition is played within a *national association* where *CBA* is applicable, but *CBA* is not applicable within the player’s own *national association* (either overall or for the relevant *handicap category*). Does the calculated *CBA* apply to the score of the hosted player?

Yes. If *CBA* is applicable within the hosting *national association*, then scores returned in that competition by players from a different *national association* should include the *CBA* for their handicap adjustment calculation.

4.2 May an *affiliated club* or *national association*, where *CBA* is not applied, calculate the *CBA* in order to allow away players to return their scores to their *home clubs* with this information?

Yes. Although *CBA* is not applied within the organising body of such a competition, the *CBA* may be calculated, if possible, and made available for away players for handicapping purposes.
5. EGA HANDICAP AND EGA PLAYING HANDICAP

5.1 How should the **playing handicap** of players from outside the jurisdiction of the *EGA Handicap System* be applied when they participate in a competition played according to the *EGA Handicap System*?

**CONGU:**
First, the handicap of a golfer holding a CONGU ® Exact Handicap is converted into an *EGA Handicap* as follows:

\[
EGA \text{ Handicap} = \frac{CONGU \text{ Exact Handicap} \times 113}{124}
\]

Then, the **playing handicap** for the competition is calculated as defined in Section 3.9.

T (124 is the approximate average of course slopes in CONGU)

**Example:**
A player with a CONGU Exact Handicap of 15.6 plays a competition under the *EGA Handicap* jurisdiction.

The course has a **Course Rating** of 70.6, a **Slope Rating** of 119 and the Par is 71.

First, the CONGU Exact Handicap is converted into an *EGA Handicap* using the following formula:

\[
EGA \text{ Handicap} = \frac{15.6 \times 113}{124} = 14.2
\]

Then, his equivalent *EGA Handicap* of 14.2 is used in the *EGA Playing Handicap* (PH) formula:

\[
PH = EGA \text{ Handicap} \times \frac{SR}{113} + (CR - PAR) = 14.2 \times \frac{119}{113} + (70.6 - 71) = 15.553 \approx 15
\]

His *EGA Playing Handicap* will be 15.

**USGA:**
First, the handicap of a golfer holding a **USGA Index** is converted into an *EGA Handicap* as follows:

\[
EGA \text{ HANDICAP} = \text{USGA INDEX}
\]

Then, the **playing handicap** for the competition is calculated as defined in Section 3.9.

Other countries:
Countries using handicapping systems other than CONGU and **USGA** which use the **USGA Course Rating System**: see **USGA**.

5.2 How may handicaps determined by handicapping systems other than the *EGA Handicap System* be converted into *EGA Handicaps*?

Handicaps from external systems are converted to an *EGA Handicap* once a player becomes a member of a golf club affiliated to an *EGA Handicap System* licensee golf authority and that club is nominated as the player’s home club. A copy of the player’s handicap record should be obtained and retained by his new home club. The following does not apply to players from outside the *EGA’s jurisdiction for single competitions* (see Decision 5.1).

Conversion of a **CONGU ® Exact Handicap** into an *EGA Handicap*

Any conversion of handicaps from CONGU to *EGA can only be approximate. As **Slope Rating** is not part of the **CONGU ® Handicapping System**, therefore they have to be Slope-adjusted as follows:

\[
EGA \text{ HANDICAP} = \frac{CONGU \text{ ® EXACT HANDICAP} \times 113}{124}
\]

(124 is the approximate average of course slopes in CONGU)
Conversion of a USGA Index into an EGA Handicap

As USGA Indexes are based on Slope, no additional Slope conversion has to be done. Therefore the USGA Index will become the EGA Handicap.

| EGA HANDICAP = USGA INDEX |

Other countries:
Countries using handicapping systems other than CONGU and USGA which use the USGA Course Rating System: see USGA.
In all other cases, the player must return, as soon as possible, one score over 18 or 9 holes played under handicap conditions, in order for a new EGA Handicap to be allocated under the requirements of Clause 3.11.3.

5.3 How should a player ensure that his playing handicap on the score card is correct? May the Committee waive the penalty of DQ?
To satisfy Rule 6-2 and Rules of Golf Decision 6-2/1 the player is recommended to undertake the following actions, specifically when playing away:
1. write the EGA Handicap on the card if it does not appear in the printed section. Check the playing handicap with the playing handicap table, enter or adjust if required;
2. if the EGA Handicap is printed on the card, check the value and correct if required. Check the playing handicap with the playing handicap table, enter or adjust if required;
3. if no playing handicap table is readily available* check with the Committee when the EGA Handicap is missing or incorrectly recorded. Otherwise assume the computation is correct;
   * “Readily available” means displayed in the area where score cards are issued close to the starting tee or in the recording area.
The above routine does not absolve the player from his responsibility under Rule 6-2, but will normally take care of wrong playing handicap information for an individual player due to recent alterations to his EGA Handicap or other administrative errors.
However, when a system error has been made in computing the playing handicap(s) and no means of verification are available to the player(s), this is a Committee error that should warrant waiving the penalty of disqualification under Rule 33-7.

6. HANDICAP REVIEW

6.1 How must a handicap committee consider a score played under the jurisdiction of CONGU for handicap review purposes?
The CONGU Handicap System is not based on Slope. Therefore the value of 124, the approximate average of course slopes in CONGU, must be used if the relevant Slope Rating is not available.
